PROFESSIONAL EXPERIENCE

Data Engineer, Prometheus Federal Services May 2023 – February 2025

- Architected a distributed RAG-based AI platform using Django and Azure Cognitive Services
- Designed and scaled high-throughput ingestion and retrieval pipelines for AI-driven applications
- Built data-processing services supporting document ingestion, indexing, search, and downstream AI workflows

Solutions Architect, Adlucent April 2022 – May 2023

- Designed and deployed a real-time ELT platform for event processing using GCP, Django, Kafka, and BigQuery
- Automated infrastructure and CI/CD pipelines, reducing build times 62% and costs 97%

Software Engineer, Node40 August 2021 – March 2022

- Built data ingestion and normalization pipelines from multiple cryptocurrency exchanges and external APIs
- Streamlined AWS infrastructure provisioning and deployments to improve development efficiency

Senior Software Engineer, Ridgeline International January 2018 – August 2021

- Engineered embedded firmware in C and Lisp for resource-constrained IoT devices
- Developed automated tooling for provisioning and managing large fleets of mobile devices
- Architected virtualized Android environments using ARM/QEMU for repeatable debugging, testing, and analysis

Software Engineer, Students of Georgetown Inc. October 2015 – December 2017

- Led cloud infrastructure migration, reducing costs 85% and improving system reliability
- Modernized application infrastructure and production deployment workflows

Software Engineer, Pigeonly February 2014 – May 2015

- Built distributed search and data processing systems using Django and Celery
- Redesigned and migrated legacy Symfony systems to a scalable Django architecture

IT Analyst, Atlas Research September 2012 – January 2014

- Supported enterprise system integration and production troubleshooting across multiple environments

TECHNICAL SKILLS

Languages: Python, SQL, TypeScript, JavaScript, Java, PHP, Bash

Data Engineering: ETL/ELT, Kafka, BigQuery, Databricks

Cloud & Infrastructure: Azure, AWS, GCP, Docker, Terraform, CI/CD

Backend & AI: Django, FastAPI, Celery, Azure Cognitive Services, RAG, vector search

Certifications: Certified ScrumMaster, Certified Scrum Product Owner

EDUCATION

Quantic School of Business and Technology – Executive MBA

American University – BS Computer Science; MS Computer Science
